

Tools of the Trade

Like all modern industries, evolving technology is shaping the nature of the remanufacturing sector. We recognized this trend long ago, and have kept our production process at the cutting edge.

Computers are now as vital as saw blades, and form an integral part of our facilities. Computerized production scheduling, dry kiln control, and a sophisticated inventory control system all streamline the process and benefit the customer.

We also employ modern, efficient technology on our remanufacturing lines, along with the latest equipment for moisture content analysis. An overview of Gillwood Remanufacturing's many capabilities is included below.

PRODUCTION FACILITIES AND EQUIPMENT

4 - MOULDERS TO 6" X 12" & 612 STETSON ROSS PLANER

12 LOW PRESSURE STEAM KILNS (4 MILLION/MT)

42" TWIN BAND FINE KERF RESAW

2 SORTING CHAINS

IN-LINE HORIZONTAL RESAW

NINE TRAY SORTER

12 PRECISION CHOP LINES

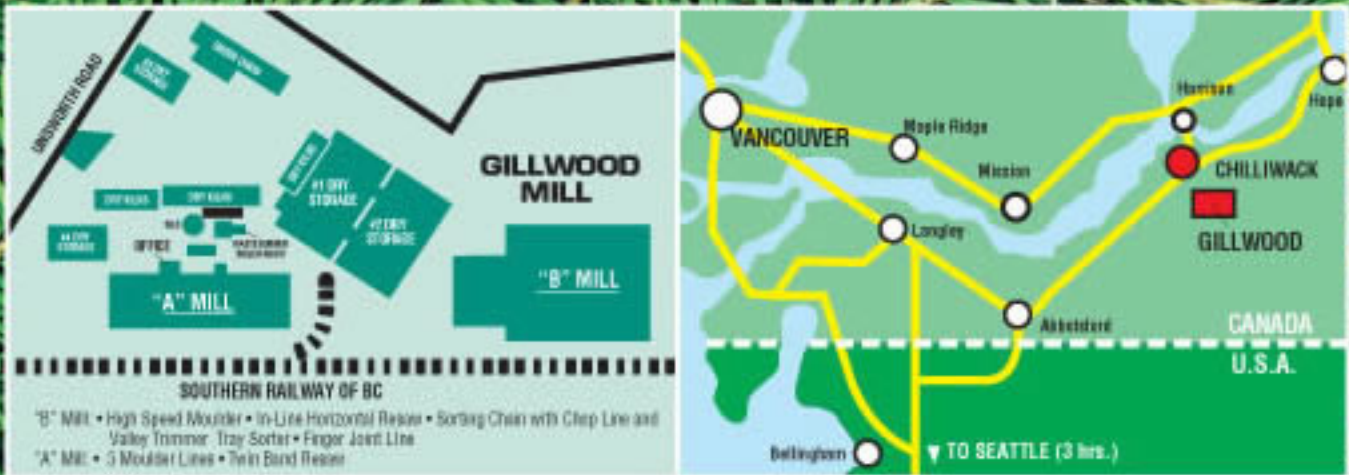

225,000 SQ. FT. OF COVERED AREA

2 - FINGER JOINT LINES (UP TO 40' IN LENGTH)

FULLY FENCED PAVED YARD

LISA COMPUTERIZED INVENTORY CONTROLS INCLUDE:
LABELS ON ALL PRODUCTION LOTS • HAND-HELD BAR CODE READERS FOR INSTANT SHIPPING AND INVENTORY CONTROL • COMPUTER TRACKING OF ALL INVENTORY

Ideally located just a 1 hr. drive from Vancouver and 3 hrs. from Seattle, Gillwood is on a Railway spur, and has easy access to any shipping method our customers require.

GILLWOOD

REMANUFACTURING INC

COMMITTED TO
GILLWOOD
REMANUFACTURING INC.
SINCE 1966
FINEST QUALITY

COMMITTED TO OUR CUSTOMERS, COMMITTED TO OUR FORESTS

Over 45 years of experience in the production of the finest quality wood remanufactured products has placed Gillwood at the forefront of the industry.

Government, industry, the public... everyone is acutely aware of forest conservation issues.

At Gillwood Remanufacturing we've known since 1965 that our forests are far too valuable to waste. We built a solid reputation as the industry leader in custom remanufacturing and kiln drying by adding value to every possible inch of our customers' lumber.

Whether the raw material is rough sawn wood, trim ends or salvaged waste, our modern, efficient processing equipment can upgrade it to high-quality finished products. That not only helps to keep our forests green, but also keeps our customers in the black.

We are proud of our role in maintaining a sustained yield in our forests, but we take even more satisfaction from providing innovative value-added solutions to the most challenging needs.

... the Wood Specialists... Leading the Industry

Gillwood, Committed to Customer Service

We define customer service as a commitment to value and quality based on an understanding of each customer's goals.

Our modern, efficient production equipment provides optimum value to the value added process by generating the maximum yield from every board foot of material.

Quality stems from the pride of workmanship that motivates all our staff. Their products meet international standards and are routinely shipped to quality-conscious customers in the United States, Europe and Japan.

We work closely with every customer to customize a quality-driven production run that will extract the most value with the least waste. Customers are invited to participate right through to on-time shipping.

...Customer Service: we mean it.

Custom Services

Kiln Drying

Our twelve computer-controlled low pressure steam kilns are among the most energy efficient in the industry and are fuelled by our own waste chips. Round the clock monitoring by skilled staff using the latest technology, results in the highest quality product.

Heat Treating

Gillwood Remanufacturing facilities can handle an almost unlimited volume of heat treating. Our products meet European Economic Commission plant health requirements, and are shipped with all necessary documentation.

Custom Milling

Our highly skilled grinder men can machine moulder heads to create virtually any specified profile. With more than three decades of milling experience, we can also suggest other profiles to minimize waste and maximize profits.

Grading and Sorting

The many licensed graders on staff at Gillwood continually upgrade and refresh their skills. We are a Council of Forest Industries member through Canadian Mill Services.
